

A Story of Film: A New Generation

I was more than impressed by [this documentary](#) of recent film made by Mark Cousins available on demand. This is international in its scope and certainly is epic for what it attempts to survey. Films from Korea to India to Chile are featured with an eye to how filmic visualizations have appeared on screens from 2010-2020 including the effects of Covid on such things as on-demand and streaming content. I was pleased to add a few new films to my “must watch” list for my holidays including [Baby Driver](#), [Moonlight](#) and [Vengeance](#).

[Propaganda](#)
