

Another fan mashup - Prometheus and Alien together at last (?)

I have a friend who will remain nameless who cringes each time I speak about the wonder that is *Prometheus*. I joke with him because he has zero time for anything that I have to say on the matter, although he did like the *Alien* series. So imagine my surprise when I stumbled onto this *Prometheus/Alien* fan edit! I'm looking forward to watching it at [Vimeo](#).
