

# Cabin Roof weekend

I will NEVER do that again! ☹️

Four days getting eaten by bugs hauling 90lb bags of shingles up a ladder.

But I had a lot of fun hanging out with my best buddy! Outside of the over use of bug spray, the heat, the rain, the dust it was a great long weekend. Here are a few shots of some of the flowers that are out. I didn't get a chance to kayak but the summer just started!

I used my Panasonic 100-300mm for the flowers since I wanted to test it at its long range with smaller subjects like flowers. It doesn't have the character of, say, the Leica 25mm or the Olympus 60mm, but allows for wonderful depth of field. The two morning shots of the dock was with my Tokina 11-16 with the Mitakon adapter.
