How to deconstruct an image

Great article on deconstructing the photography of Alfred Eisenstaedt (you probably know *The Ballerinas* and the *VJ Kiss*). The author does a great job listing the elements of composition and the basics of “reading” the narrative of an image using famous photographs by Eisenstaedt. Click here for a great article! Read the article and then deconstruct the photography of people like Cartier-Bresson or artists like Degas.
