

Finally, a website that sucks more than mine

CERN, the high energy particle physics folks, have re-upped the first original webpage ever on the intertube [here](#). The first line reads: “The WorldWideWeb (W3) is a wide-area hypermedia information retrieval initiative aiming to give universal access to a large universe of documents.”

Stay tuned! I think this internet, sorry, this wide-area hypermedia information retrieval initiative, is going to catch on.
