

Success!

So the migration was a success!. There were some hiccups since for the first while none of my photos were showing up. And then I realized that I hadn't even backed up this site! Yikes! But all is well and everything is working now!

I'm on my Macbook now but the workflow on the iPad seems to work as well. The new version of WordPress is quite amazing! I'm going to check out the iPad app but the reviews aren't great! ☐☐
