

# True Detective: A Final Summary

The finale of True Detective certainly has the intertubes abuzz. Most thought it bland and anti-climatic. I am not one of those people. Here are the best commentaries on the show including a very fine piece on the philosophy that was quite apparent throughout the show [here](#). If you only read one piece I would suggest [this](#) one from Jacob Mikanowski in the *L.A. Review of Books* that touches each element of the show from the gorgeous and haunting cinematography of Adam Arkapaw to the music of T Bone Burnett in the opening credits.
