

update on the zombies!

OK. I have made a serious dent in World War Z. Yup. I am really enjoying it so far, its narrative structure as a series of journal entries from around the world documenting the incarnation of the disease. Great tension builder. Like the Japanese sailors wondering why their boat is shaking just before the emergence of Godzilla. We know what's coming. They don't. The book is better than what I was expecting and I can see how it will translate at the theatres. But I have to go bed. I would love to pull an all-nighter!
