Voigtlander 17.5mm f0.95 samples

I had to skip the gym today since I had way too much work to do. I left for the office right after sunrise this morning and took some samples with my new Voigtlander. The manual focus is a little tricky since I have been spoiled by auto-focus for far too long! Most at f0.95 although I did tend to focus at f5.6 and then stop down so perhaps one or two aren’t wide open.
